Education

Manipal University Jaipur	2023 – 2027
B.Tech. Computer Science (Specialization in Data Science)	Jaipur, Rajasthan
Delhi Public School, Faridabad	2022
All India Senior School Certificate Examination (Class XII)	Faridabad, Haryana

Experience

IT4T Solutions	2025
-----------------------	------

Software Development Intern

- Gained exposure to software development workflows and technology solutions used within the travel technology industry.
- Developed an understanding of how software applications support travel operations and business requirements.
- Observed software development lifecycle practices, team collaboration, and professional development workflows.

Projects

Cinematch – Vibe-Based AI Movie Recommendation Engine	2026
--	------

Full-stack web application that translates natural language user moods into curated movie recommendations.

- Architected a dynamic full-stack pipeline integrating Next.js 16 (App Router), Express.js, and Tailwind CSS.
- Integrated Groq Cloud API to leverage ultra-low latency Large Language Models (LLMs), parsing user emotional undertones and returning structured JSON data in milliseconds.
- Designed a responsive, glassmorphism-based dark theme UI featuring dynamic streaming state controls and context-aware styling.
- Built a secure backend layer managing environment isolation, modular routing, and error handling for external inference engines.

TidyBit – DSA Learning Platform	2025
--	------

Full-stack web application for practicing Data Structures and Algorithms problems.

- Developed using React.js, Node.js, Express.js, and MongoDB.
- Built an interactive problem-solving interface with questions categorized by difficulty levels and DSA topics.
- Implemented user progress tracking and a dashboard for monitoring problem-solving activity and submission history.
- Designed backend APIs for managing coding problems, users, and application data.

Neural Network Image Classification System	2025
---	------

Image classification model developed using convolutional neural networks.

- Developed using Python, TensorFlow, Keras, and NumPy.
- Built a Convolutional Neural Network with Dropout layers and Softmax activation.
- Applied data preprocessing and augmentation techniques to improve model generalization.

Technical Skills

Languages: C++, Python, JavaScript, TypeScript, HTML/CSS

Frameworks/Libraries: Next.js 16, React.js, Node.js, Express.js

Databases/Cloud: MongoDB, Groq Cloud API

Developer Tools: Git, GitHub, VS Code, Postman

Coursework: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems
